

I am very concerned that one person or company can own so much and take over the airwaves or printed word. This is like any other monopoly and needs to be controlled as to the number one entity can own; otherwise, we lose the freedom to learn all sides and choose candidates and make decisions if all we hear in our region is one side because that company has more resources and can buy out all the other companies. Please help with this important issue. It is one thing in the hog business and all the other small businesses losing their shirts to walmart, it is more serious when it comes to our public information.
